

CONTRACT

Contract KPIs:

- (A) This Party (the Club) is a semi-professional football club looking to recruit new players for the 2020/2021 ABC League.
- (B) This Party (the Player) is a football player which the Club wishes to recruit.

The Club is willing to appoint the Player – who is willing to accept – as a member of its roster for the 2020/2021 ABC League. This season is comprised of 38 match-days.

1.1 The Parties acknowledge that the Service provided by the Player is to become a member of the Club's 23-man roster, from which a 16-man squad is selected each match-day.

1.2 The Player undertakes to do the following:

- (a)** The Player shall make himself available for selection in the Club's match-day squad on any day on which the Club has match during the 2020/2021 ABC League.
- (b)** The act of "making himself available" requires the Player not to have competing commitments on the match-day during a period beginning 90 minutes before kick-off and concluding 2 hours after kick-off – such as to be available for the Club's selection.
- (c)** The Club will select its squad for each match-day 24 hours in advance of kick-off.
- (d)** The Club is not under an obligation to include the Player in any match-day squad.
- (e)** If the Club does not select the Player for a match-day squad, the Player should attend that match's venue in order to evidence his availability for selection.

1.3 The Player shall be rewarded for his availability to the sum of £150 per match-day available. This sum is to be paid on a match-by-match basis. If, however, the Player is selected in a match-day squad and scores a goal for the Club in that match, the Club will pay the Player an additional sum of £50.

1.4 The Club – upon the signing of this Contract – is obligated to deposit into an escrow account funds sufficient to cover the cost of the Player's availability in all 38 matches of the 2020/2021 ABC League. The Club is, also, to deposit into the account funds sufficient to cover the cost of the Player scoring a goal in each of these 38 matches. This gives the escrow account a total value of £7,600. The sum deposited in the account is to be converted to Jur Tokens according to the exchange rate when the Contract is signed. The escrow account shall use a wallet in order to hold the Jur Tokens.

1.5 The escrow account to be used is provided for by the Jur ecosystem. This will release the sums applicable to each match-day as soon as the information relating to that match-day is provided to the ecosystem. This procedure is described below.

Resolution Proof:

- 1.6** The Player must evidence his availability for selection in a match-day squad by signing a register held by the Club upon arriving at the venue where that match is to be played. The Club shall input this information into Jur within 24 hours of the match's conclusion:
- (a)** If the Club input that the Player has not signed the register, the Player is deemed not to have been available for selection.
 - (b)** If the Club input that the Player has signed the register, the £150 reward – in Jur Tokens – is released to the Player immediately.
 - (c)** If the Player disagrees with the information input by the Club, the Contract is referred to the dispute resolution mechanism on Jur's Open Layer.
- 1.7** The ABC League's website determines whether the Player is to be paid a £50 goal bonus. Those who run the League website have – in a separate Contract – agreed with the Club to provide details of the Club's goal-scorers within 24 hours of the match's conclusion. This website is to be linked with the Jur ecosystem such that Jur is able to release the sum of £50 to the Player – where owed – as soon as the League website is updated. If the Player believes that the League website is incorrect, the Contract is referred to Jur's Open Layer.
